Characteristic of terrain:

Stage 1 and 2: Typically, a mountain area located at an altitude of 800-1100m above sea level. The forest is mainly coniferous with varied routing, and in higher parts there are also wet semi-open areas. Numerous rock formations and stones in many parts of the area. The network of roads and paths is poor.

Stage 3: The area is located at an altitude of 400-700m above sea level. The forest is mainly coniferous with varied routing, in some places there are rocks and stones and wetlands. In the part of the map there are meadows divided by stones (embankments made of stones) A rich network of roads and paths.
